

# Vent Covers

*W*e know now that venting crawl spaces is a bad idea. By letting in outside air we increase our heating bills in the winter, increase our cooling bills in the summer, and actually let more moisture into our homes.

and actually let more moisture into our homes.

*By encapsulating the crawl space with the CleanSpace system, we can close our crawl space vents for good.*

Along with the CleanSpace encapsulation system, Basement Systems' CleanSpace Vent Covers provide a clean and easy way to save money on your energy bills, keep excess moisture out of your crawl space, and create a healthier environment for your family.

*CleanSpace Vent Covers permanently attach to your foundation walls with drilled in anchors - so they will never come off.*

*CleanSpace Vent Covers go over the old, corroded, unsightly vents for a nice clean look.*

*CleanSpace Vent Covers are durable plastic, so they'll never rust, rot or need paint. They have a foam insulation and gasket material on the inside to seal off the outside air completely. And they come in three different colors.*
