Dirty crawl spaces are common and troublesome. In 1999, Basement Systems® developed the CleanSpace® Crawl Space Encapsulation System® to solve crawl space moisture problems. Most crawl spaces suffer from moisture problems caused by high humidity and the resulting mold & rot are very worrisome. As part of a complete solution to control humidity and mold, your system should include a SaniDry™ CX – powerful, reliable, cost-effective dehumidification. The leaders in dry, below-grade technology bring to you the SaniDry™ CX!

SaniDry™ CX is cutting edge dehumidification for crawl spaces.

With a twist of the knob, you can keep your home as dry as you want it!

SaniDry CX Specifications:

- Air circulation: 300 CFM
- Supply voltage: 115VAC-single phase-60Hz
- Current draw: 6.4 amps
- Energy factor: 2.90 L/kWh
- Operating Temp.: 40°F Min., 95°F Max.
- Refrigerant: R410A
- Water removal: 109 pints/day Minimum Performance at 80°F and 60% RH
- Efficiency: 6.1 pints/kWh Minimum Performance at 80°F and 60% RH
- Air filter: Merv-11
- Main filter size: 15¼" x 10¼" x 1"
- Power cord: 10’ long, 110-120VAC, ground
- Drain hose: 8’ long gravity hose
- Width: 20"
- Height: 15"
- Depth: 37-1/4"
- Weight: 86lbs.
